Hey Clay –

I have two of these to do by COB and two entries for the biweekly too. Can you take care of Rosemont?

Thanks,
Rachel

I moved some stuff around, added acknowledgement of the incoming letter, and left a spot for you to summarize the incoming letter. Probably best that the letter be in both the WUS and connectivity fact sheets. Can't be sure which one Gina will use.

All:

As you can see from this email, the Administrator is testifying next week before the House Science Committee. The topics are in Matt Klasen's email below. 3 of the topics are OWOW alone, and one seems to be OST & OWOW, although I am not sure if its really just OST given what is in the fact sheet. Attached are fact sheets that Matt already had on the topics, but he did not have one for the Connectivity Report. Please see his notes below for each topic.

So what we need to me by COB tomorrow (so I can get the final thing to Matt by noon Thursday) is updating of these fact sheets (redline/strikeout is fine), or in the case of the Connectivity Report, a new one-pager (although I am guessing we already have something of the sort?).

John/Eric/Hazel – not sure if the nutrient sheets are really under our purview or OST's, so I am sending to you for your opinion. If you want to weigh in on them, even if it is OST's purview, let me know. I will talk to the OST SA about this today, and see what she says (but I did see an email from her indicating her own confusion on ownership of the nutrient fact sheets).
